October 18, 2022

10:00am-6:00pm

MORGAN TECHFEST

About Morgan TechFest

Morgan TechFest is a tech based event sponsored by Morgan State University's Computer Science Department.

The goals of Morgan TechFest are to educate Morgan students on the impact of technology on their career path, to get them connected with tech organizations, and to strengthen ties between the Computer Science Department and technology industries.

Computer Science Department

- Bachelor of Science (BS) in Computer Science
- Bachelor of Science in Cloud Computing
- Master of Science (MS) in Bioinformatics
- Master of Science in Advanced Computing

Event Information

Target Audience: All Morgan students

Theme: The Impact of Technology on Your
Career Path

Date: Oct 18, 2022

Time: 10am - 6 pm

Location: Calvin & Tina Tyler Ballroom hall

Morning Session

Presenter: Barisi Nuka (Introduction of Speakers)

10:00am

Tech Talk

(10:05am-11:05am)

- Talk 1: Morgan State University Provost: Dr. Hongtao Yu
(10:05am - 10:15am)
- Talk 2: Dr. Timothy Akers, Assistant Vice President, Research Innovation & Advocacy
(10:20am - 10:40am)
- Talk 3: Dr. Yacob Astatke, Assistant Vice President for International Affairs
(10:45am - 11:05am)

Presenter: Introduces the panelists,

11:05 - 11:20pm

- Panel Discussion, Chelsea, (President, Women in Computer Science)
(11:25pm - 12:50pm)

Panelist

- Dr. Paul S. Wang, Chair Computer Science
- Dr. Md Rahman, Associate Chair, Computer Science
- Prof. Durakiewicz, Tomasz: National Science Foundation (NSF)
- Michael McDonald Google
- Taofeek Obafemi: Microsoft,
- Micheal Hoggard: Amazon,
- Rebecca Rosena: Goldman Sachs
- Dr. Monir Sharker: Director of Programs, Computer Science
- Dr. Radhouane Chouchane: Associate Prof. Computer Science
- Dr. Oludare Owolabi, Associate Professor, Civil Engineering

Vote of Thanks: Opeyemi Adeniran,

12:55 - 1:00pm

Launch & Networking

1:00pm

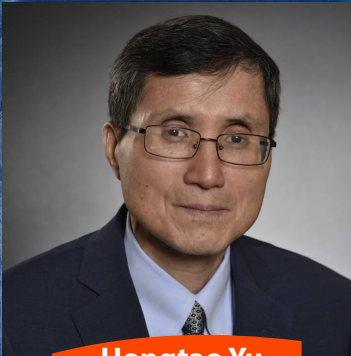

Networking Session

- Bloomberg
- HBCU 20x20
- Microsoft
- Google
- Goldman Sachs
- Roku
- Amazon,
- M&T Banks
- JustOne Technology Academy
- Fannie Mae

MORGAN
TECHFEST

SPEAKERS & PANELIST **BIOGRAPHY**

Dr. Jacob Astatke

Dr. Jacob Astatke currently serves as the Assistant Vice President (AVP) for International Affairs at Morgan State University (MSU), a position he has held since July 2017. As the AVP he plays a key role in the implementation of Goal#6: "Accelerate Global Education Initiatives and Expand the University's International Footprint " for Morgan's new 10 year strategic plan (2021- 2030). In addition, the Division of International Affairs (DIA) played a crucial role in the signing of a major partnership with the Tertiary Education Fund (TETFund) of Nigeria that has brought more than 100 Ph.D. students and postdoctoral scholars to Morgan since September 2020. As such, the DIA is actively seeking to grow Morgan's relationships and partnerships with universities and public/private organizations around the world in line with our strategic plan of "Growing the Future, and Leading the World." Prior to becoming the AVP for International Affairs, Dr. Astatke was a full-time faculty member in Clarence M. Mitchell Jr. School of Engineering for over 23 years, where he rose to the position of Associate Professor and Associate Dean for Undergraduate Education. For over a decade now, Dr. Astatke has facilitated the donation of hundreds of Electrical and Computer Engineering (ECE) portable laboratory instrumentation boards and has conducted capacity- building training workshops for more than 25 universities in Ethiopia and other countries in Africa and Asia in collaboration with the Global Engineering Deans Council (GEDC), the International Federation of Engineering Education Societies (IFEES), and the African Engineering Education Association (AEEA) . This work has improved the education of thousands of ECE students in Ethiopia and the rest of Africa. Dr. Astatke is the recipient of several national and international awards, including: the 2013 American Society for Engineering Education (ASEE) "National Outstanding Teaching Award," the "2016 Global Engineering Deans Council (GEDC)-Airbus Diversity Award," and the "2016 Black Engineer of the Year (BEYA) for College Level Promotion of Education."

Dr. Radhouane Chouchane

Dr. Radhouane Chouchane is passionate about developing and delivering quality projects that build on the current developments in cloud computing, machine learning (ML), natural language processing (NLP) and malware detection technologies. His current research interests have to do with leveraging NLP and ML in the cloud to serve as a decision support procedure for the task of malware detection through authorship attribution. His ongoing research interests aim to use NLP and ML in the cloud to assist with the course planning and development processes. Since 2011, Dr. Chouchane has been actively involved with such organizations as STARS, WIT and NCWIT whose mission is to broaden the participation of underrepresented minorities in computing.

Dr. Hongtao Yu

Dr. Hongtao Yu, Provost & Senior Vice President for Academic Affairs at Morgan State University, and Professor of Chemistry, received his BS in Chemistry from University of Science and Technology of China, MS in Chemistry from the Chinese Academy of Sciences, and Doctorate in Bioorganic Chemistry from the Technical University of Munich. He did postdoctoral research at Louisiana State University and University of Texas at Austin. From 1996-2016, he was an assistant, associate and full professor, and Department chair for thirteen years, at Jackson State University. He served as dean at Morgan State for five years before becoming the Provost. Dr. Yu received numerous awards including "Stanley Israel Award" (ACS, 2011), "Outstanding Contribution to Science" (MAS, 2014), "HBCU Pioneer Award" (NOBCCHE, 2015), "Diversity of Excellence Award" (IHL, 2016), and "Humanitarian Award" (NTA, 2021). Dr. Yu is listed as a top 2% scientist in the world with over 150 peer-reviewed publications.

Dr. Timothy A. Akers, M.S., Ph.D.

Dr. Timothy A. Akers, M.S., Ph.D. is the Assistant Vice President for Research Innovation and Advocacy in the Division of Research and Economic Development, and Professor of Public Health, at Morgan State University (MSU), one of the nation's oldest Historically Black Colleges and Universities (HBCUs). For the past 35 years, Dr. Akers has worked with local and federal governments, both domestically and internationally, the private sector, philanthropy, and academia in developing sponsored projects, technologies, and programs.

Prior to MSU, Dr. Akers was also a Senior Research Administrator at a major university where he worked with faculty in conceptualizing and developing projects and writing proposals. Dr. Akers was also the Senior Behavioral Scientist and program officer with the U.S. Centers for Disease Control and Prevention (CDC) where he managed CDC's largest academic cooperative agreement to the eight leading minority health professional schools. Dr. Akers has also held the position as Senior Research Scientist for the College of Human Medicine's David Walker Research Institute at Michigan State University, whose mission was to focus on African American male health disparities.

Currently, Dr. Akers also serves as the Chairman of the Board to the Intercultural Center for Health, Research, and Wellness and on the National Advisory Board to Dia de la Mujer Latina, both nonprofit 501c3 organizations, located in Houston, Texas. Both nonprofits are missioned to reduce health disparities by providing education and training to Community Health Workers throughout the U.S. and Latin America (www.interculturalhrw.org/ and www.diaделamujerlatina.org/).

Dr. Akers' primary role, duty, and responsibilities are to work with faculty (staff and students) throughout the university, across diverse disciplines, to help them conceptualize innovative research ideas while also mentoring proposal development, building collaborations and partnerships, and seeding, conceptualizing, and implementing research agendas, research portfolios, and research enterprises. Dr. Akers has helped to build a comprehensive research infrastructure and enterprise for the university that spans education, public health, q-STEM, liberal arts and humanities, business, and the social and behavioral sciences, to include intellectual property ideas. Dr. Akers has personally received and/or mentored faculty and external partners in obtaining grants, contracts, interagency and cooperative agreements with Maryland state offices, NSF, NIH, CDC, DHS, DoD, NASA, NSA, SAMHSA, and many other sponsors. And, from 2008 to 2019, Dr. Akers served as principal investigator for sponsored research funding from the U.S. Department of Homeland Security, Directorate of Science and Technology, to focus on research of undergraduate students and early career faculty at minority serving institutions in visual analytics for science and technology.

In 2020, Dr. Akers was appointed by the White House Office of Science and Technology Policy and the U.S. Department of Energy to serve as a founding member to the nation's first National Quantum Initiative Advisory Committee (NQIAC) for the U.S. In the same year, Dr. Akers' latest NSF grant was to create and establish the National Quantum Literacy Network (NQLN), a consortium of HBCUs, minority business enterprises, and national laboratories to work together to address the hyper-disparities in quantum literacy through the creation of new and innovative research pedagogy for teaching and learning quantum literacy education.

In 2021, Dr. Akers formally established the National Quantum Literacy Network with a focus on diversity, equity, and inclusion for historically underrepresented groups. (www.quantumliteracy.com and www.quantumliteracy.org). Dr. Akers is currently working with the QED-C (Quantum Economic Development Consortium) as co-chair to the QED-C Subcommittee on Foundations for the Workforce Development TAC (Technical Advisory Committee). Nationally, Dr. Akers is working with businesses, to include minority business enterprises, interested in quantum literacy and quantum application technologies for workforce development training. Dr. Akers and his team have been providing input and advise to agencies in DOD, national health research, and commerce, among other agencies and organizations. Dr. Akers has been developing micro-credential certification modules in quantum literacy to expedite the learning process for workforce development.

Dr. Akers is a former U.S. Air Force Security Police, specializing in counter-terrorism for nuclear weapons and ICBM missile security, where he served as fire team leader with the elite USAF Emergency Services Team (EST), Strategic Air Command (SAC). He has received numerous awards and honors, including the U.S. Air Force's prestigious Meritorious Achievement Medal for Research, Visionaries Innovation Award from the U.S. Department of Treasury, and Vision Awards from Morgan State University, including an award in mathematics for his mentorship of undergraduate and graduate students in interdisciplinary innovation, as well as receiving the National Minority Research Mentorship award.

Md Mahmudur Rahman, Ph.D.

Associate Chair and Associate Professor of CS

Computer Science Department

Office: McMechen 620

Morgan State University, Baltimore, MD

Phone: 443 885 1056

Email: md.rahman@morgan.edu

Web: www.morgan.edu/cosc/mrahman

Google Scholar:

https://scholar.google.com/citations?user=Qf_Uf5AAAAAJ&hl=en

ResearchGate: https://www.researchgate.net/profile/Md_Rahman114

Dr. Mahmudur Rahman is currently serving as Associate Chair and Professor of Computer Science at Morgan State University. He received the PhD in Computer Science from Concordia University, Montreal, Canada (2008) with an emphasis on Medical informatics and Image Retrieval. Prior to joining as an Assistant Professor at Morgan State University in 2014, Dr. Rahman extensively conducted research at the National Institutes of Health (NIH), USA for almost six years as a Research Scientist. He has good expertise in the fields of Computer Vision, Image Processing, Machine Learning and Deep Learning and their application to retrieval and annotation of Biomedical images from large collections. Since joining Morgan, Dr. Rahman also has been actively involved in basic instructional (CS Education) research by infusing several interactive and active learning techniques in classroom to teach introductory programming courses with a goal to improve the retention rate in the CS department.

Dr. Rahman has published two books both as author and editor, two book chapters and more than seventy articles in peer-reviewed journals and conference proceedings. He also received several competitive grants (>\$3M) from NSF and other funding agencies for both Imaging Informatics and Applied Machine Learning based research and CS Educational research. Dr. Rahman supervised (thesis advisor) several graduate and undergraduate (as research mentor) during the past several years and several students are currently working as Research and Teaching Assistants in his research lab and classes. Due to his outstanding contributions in teaching, research and service, Dr. Rahman received the Morgan Faculty Excellence in Instruction or Pedagogical Innovation Award for AY 2020-2021, Life Science IP Innovation Award (2020) and Instructional Innovator of the Year award (2019) on behalf of the Office of Technology Transfer (OTT) and the Division of Research & Economic Development at MSU. In addition, he also received the Dean's Faculty Award for "Excellence in Service" in 2019 and Dean's Faculty Award (2017) for "Excellence in Research" in 2017. During his tenure at National Library of Medicine (NLM) at NIH, Dr. Rahman also received the "Special Act or Service Award" for four consecutive years (2009-2012).

civil engineering and STEM education. He is a professional engineer registered in Maryland. Dr. Owolabi maintains membership in the Committee on Geo-Environmental and Climatic Impacts on Geomaterials (AKG300) of the Transportation Research Board (TRB), where he plays a vital role in facilitating the exchange of transportation research information and results, through; development of research problem statements in transportation; review and recommendation of papers for publication and for TRB Annual meetings.

Prof. Tomasz Durakiewicz

Prof. Tomasz Durakiewicz received his Ph.D. in Poland in 1998 in the area of Experimental Physics for work on surface properties of metals. After spending a year as Visiting Professor at the University of New Mexico, Durakiewicz joined Los Alamos National Laboratory in 2000 as Director's Funded postdoc and converted to staff member in 2003. His main research interests are related to the electronic structure of f-electron materials, mostly actinides, explored by angle-resolved photoemission. In addition, Durakiewicz worked on the electronic structure of topological systems, thermionic emission and work function, and also on applications of stable isotopes. Durakiewicz has co-authored over 190 peer-reviewed publications, over 210 conference abstracts, and 6 patents, and presented over 60 invited talks. His published work was cited over 5300 times. Since July 2014 Durakiewicz serves as Program Director for Condensed Matter Physics at the National Science Foundation, Division of Materials Research. Between February 2019 and January 2020 served as Staff Associate, Office of the Assistant Director, Directorate for Mathematical and Physical Sciences, and between August 2021 and April 2022 was in detail to the Division of Human Resource Development, Directorate of Education and Human Resources.

Dr. Owolabi, P.E.

Dr. Owolabi, P.E., joined the Morgan State University (MSU) faculty in the summer of 2010. He is the Director of the Sustainable Infrastructure Development, Smart Innovation and Resilient Engineering Research Laboratory as well as the Director of the Undergraduate Geotechnical Laboratory at the department of Civil Engineering. In 2020, he was the interim Associate Chair of the department of Civil Engineering. He has about 30 years of outstanding experience in practicing, teaching, and research in civil and transportation engineering. Dr. Owolabi earned his doctorate in civil and environmental engineering in 2007, from George Washington University as well as Masters in civil engineering (transportation engineering) from the prestigious Federal University of Technology, Akure Nigeria. He completed his Bachelor of Science in civil engineering from the premier Obafemi Awolowo University, Ile-Ife, Nigeria in 1991. In 2019 under his leadership as the Accreditation Board of Engineering and Technology (ABET) Accreditation Coordinator, he successfully led the department to attain another six-year accreditation cycle without any observation, concern, shortcoming, or deficiency being the first of such in the history of the department.

Dr. Owolabi is also the recipient of the 2020 Morgan State University Outstanding Faculty Award for Excellence in Service. He is an expert in advanced modeling and computational mechanics. His major area of research interests centers majorly in, geotechnical engineering, engineering education, sustainable infrastructure development, computational geomechanics, pavement engineering, Soil mechanics, physical and numerical modeling of soil structures, constitutive modeling, pavement design, characterization and prediction of behavior of pavement materials, linear and non-linear finite element applications in geotechnical engineering, geo-structural systems analysis, structural mechanics and material model development. He is considered to be a paradigm of a modern engineer, possessing a combination of practical experience with the most advanced numerical analysis tools, and knowledge of material constitutive relations - things essential to addressing the challenges of advanced material research and development.

Dr. Owolabi has secured, as PI or Co-PI, about \$2.46 million in research grants that solved society problems in transportation engineering, fostered sustainable infrastructure development and enhanced student engagement in the STEM fields. Dr. Owolabi currently is the Principal Investigator of a three-year \$1.5 Million NSF grant that cuts across multiple STEM disciplines at Morgan titled "Adapting an Experiment-centric Teaching Approach to Increase Student Achievement in Multiple STEM Disciplines". Dr. Owolabi has authored over 40 publications/presentations in

Paul Wang

Paul Wang is a Professor and the Chairperson of Computer Science at Morgan State University. He is a LINK Fellow and has held positions as the TSYS Endowed Chair in Cybersecurity by a \$5 million endorsement, Director of Center for Security Studies with more than 3,000 cyber students, and Chief Information and Technology Officer (CIO/CTO) of the National Biomedical Research Foundation. He has been a consultant to many companies and serving on multiple boards and government and private sector technology committees. Paul was directly involved in drafting of the National Initiatives of Cybersecurity Education (NICE) framework. His research areas are quantum crypto, secure architecture, AI/ML, IoT/CPS, and video indexing. In addition to books, refereed publications, conference speakers and numeral grant activities including recent grants from NSF, NSA, Apple, and Microsoft, Paul has four patents; three of them have been licensed to the industry. Paul Wang received his Ph.D. under Dr. Robert Ledley, the inventor of body CT scanner in 2004. He completed postdoc studies in quantum computing at MIT following a renowned scholar Peter Shor and in AI and data science at University of Cambridge.

Research Interests:

Secure architecture, AI/ML, quantum cryptoanalysis, IoT/CPS, and video indexing.

Nicole Tinson

A native of South Central Los Angeles, Nicole Tinson is an HBCU, Diversity and Inclusion, and Civil Rights advocate. She has learned to transform her pain into power, and has made it her life's work to empower others along the way. Nicole became actively involved while a student at Dillard University serving in various leadership capacities including: President of the NAACP chapter, the Social Action Chair for the Beta Gamma chapter of Delta Sigma Theta Sorority, Inc. and a founding member of the Black Youth Project 100 (BYP100). She was also a Young People For (YP4) fellow and an Emerging Leaders intern through the Congressional Black Caucus Foundation and interned in the Office of Congressman Cedric Richmond (LA-02). While at Dillard, she was selected for the inaugural White House HBCU All Star program and succeeded in confirming First Lady Michelle Obama as Dillard's commencement speaker. Thereafter, she attended graduate school at Yale to study the intersections between politics and religion. While there, she organized student protests and demonstrations and effectively worked with Yale's administration and student leaders on ways to be more inclusive of the diverse student body, including increasing funding to hire faculty of color and changing a college's name. Nicole has had the opportunity to speak at the US Department of Education, the White House (under the Obama Administration), Take Back the Night, Forbes CMO Summit, Black and Engaged, Wonder Women Tech, Dillard and Yale University. She is also a member of the US Black Chamber of Commerce. Nicole has received numerous awards and honors including: Forbes 30 Under 30, The Root 100, HBCU Buzz's 30 Under 30 award, NAACP Meritorious Woman Award and has

MORGAN
TECHFEST

PANELIST COMPANIES REPRESENTATIVE BIOGRAPHY

Taofeek Obafemi Babatunde

A graduate of Morgan State University (Spring '20(B.Sc), Spring '21(M.Eng) and Fall '21(M.Sc)). Currently working as a Software Engineer for Microsoft.

Michael McDonald

Class of 2020 Morgan State University graduate with a bachelors in Computer Science. During his time at Morgan, he was:

- Vice President of the Caribbean Student Association
- Student Ambassador
- Clara Adams Honor Student
- Resident Assistant
- Brother of the Beta Alpha chapter of Alpha Phi Alpha Fraternity, Inc.

Currently, he's a Site Reliability Engineer at Google in New York City.

Mike Hoggard

Mike Hoggard is a Diversity Recruiting Program Manager with the Amazon Web Services (AWS) Early Career Talent team. He's been with the company for over 3 years and is from VA Beach. His team leads the diversity recruiting efforts for AWS Early Career Talent and creates mechanisms to prepare and support candidates. He has a passion for people and is a connector by nature. He connects people to opportunities and to each other and enjoys establishing relationships.

Nicole Tinson

A native of South Central Los Angeles, Nicole Tinson is an HBCU, Diversity and Inclusion, and Civil Rights advocate. She has learned to transform her pain into power, and has made it her life's work to empower others along the way. Nicole became actively involved while a student at Dillard University serving in various leadership capacities including: President of the NAACP chapter, the Social Action Chair for the Beta Gamma chapter of Delta Sigma Theta Sorority, Inc. and a founding member of the Black Youth Project 100 (BYP100). She was also a Young People For (YP4) fellow and an Emerging Leaders intern through the Congressional Black Caucus Foundation and interned in the Office of Congressman Cedric Richmond (LA-02). While at Dillard, she was selected for the inaugural White House HBCU All Star program and succeeded in confirming First Lady Michelle Obama as Dillard's commencement speaker. Thereafter, she attended graduate school at Yale to study the intersections between politics and religion. While there, she organized student protests and demonstrations and effectively worked with Yale's administration and student leaders on ways to be more inclusive of the diverse student body, including increasing funding to hire faculty of color and changing a college's name. Nicole has had the opportunity to speak at the US Department of Education, the White House (under the Obama Administration), Take Back the Night, Forbes CMO Summit, Black and Engaged, Wonder Women Tech, Dillard and Yale University. She is also a member of the US Black Chamber of Commerce. Nicole has received numerous awards and honors including: Forbes 30 Under 30, The Root 100, HBCU Buzz's 30 Under 30 award, NAACP Meritorious Woman Award and has been inducted into Dillard University's 40 Under 40. Nicole is a past Advisory Board Member of MC Lyte's Hip Hop Sisters Foundation and a past board member for Pay Our Interns.

Efuru Okororie

Efuru Okororie is a Product Manager in the Credit Cards business at Goldman Sachs. Before starting this role in February of 2021, she was a Project Manager in the Controllers Division where she oversaw new business projects that impacted Product Controllers. She graduated from the Graves School of Business at Morgan State University in 2018 with a degree in Finance.

PROJECT

A call for support from companies

The department is currently addressing societal needs, particularly in the ongoing delivery of high-quality education and the construction of computer facilities and student environments. Given the advancement of technology and the importance of this degree, the TechFest project is much more interested in establishing a TechHub for computer science students, a technologically advanced reinforced space to support ongoing innovation in ideas, classrooms, study rooms, living and learning communities, and tech-related events.
